GENERAL INFORMATION

OFFICIAL LANGUAGE: English

SLIDES

Only PC data projection will be available in every room.

All slides must be worded in English only; please copy your work - prepared in PowerPoint - on a CD or USB stick.

The Slide Centre will be available for presenters and speakers to preview their slides and to become familiar with audiovisual equipment. Slides should be handed in one hour before the beginning of the session and collected at the end. The use of personal laptops in the Workshop room is not permitted.

WORKSHOP OBJECTIVES

In the last years new indications for the implant of ICDs and CRT devices, as well as the extension of human life significantly increased the number of CIEDs. This extensive use of devices increased in turn the number of device related complications, most involving pacing and defibrillating leads, thus rising the importance of transvenous lead removal techniques. The meeting get together many international experts in transvenous lead removal, with the aim to focus on the state-of-the-art of lead extraction, report worldwide experiences and results and finally debate about the most important issues about these techniques.

CARLO CONTINI AWARD 2011: ORIGINAL CLINICAL CASE

Abstracts must be submitted **within May 23, 2011** and sent by e-mail at l.bini@adriacongrex.it. They must be written in English in word format. The Scientific Committee will review all the submitted abstracts. The first author will receive notification of acceptance. It will be assigned an award of Euro 2.000,00 to the best clinical case selected by the Scientific Committee.

ATTENDANCE CERTIFICATE

A certificate will be given to all participants at the end of the meeting.

MEETING VENUE

Auditorium del Museo dell'Opera della Primaziale Pisana, Piazza Duomo 17

The Opera was established at the time of the first works for the erection of the monuments of Piazza del Duomo, which took up and distinguished the whole period of the mediaeval city-republic of Pisa. As proven by the two famous inscriptions on the façade of the Cathedral, in 1064 the first stones of the Cathedral were laid, and victorious expeditions headed for the Sicilian coasts and the port of Palermo; and the new temple was built at the time of Bishop Guido (dead in 1076). Since 1987, the group of monuments of Piazza del Duomo di Pisa has been declared World Heritage by UNESCO.

As it is so close to the monumental complex of Piazza dei Miracoli, it is the ideal place to host this meeting as well as offering many pleasant occasions for entertainment and culture of the Opera Primaziale Pisana, with a unique view of the Tower and the monuments of the square.
